

02. CANOPY COMPETITION

Fall 2023

Collaboration with Alden Schutz & Serena Choy

MENTOR - Michael Ezban

Competition Win - Conceptual Design

The winning design for the canopy competition hosted by XFoundry Fall 2023 was developed with the intention to use biogenic design to show off the interdisciplinary values of the Idea Factory. The cells of the canopy act as a mosaic showing off the different disciplines coming together.

I focused on the canopy pushing for its three tiers. I modeled the cells that make up the mosaic. Together we determined the organization of the cells to make sure that its self watering system along with the folage coverage worked and created the best user experience.
