MONOCACY MEMORIAL PARK EDUCATION CENTER

Fall - 2024

PROFESSOR Michael Ezban

STUDIO IV

The Education Center, is able to host educational events or classes with its three classrooms, auditorium and event room on the second floor. The building serves as a threshold to its central garden composed of native maryland plants. The building is on stilts to disturb the soil as little as possible. Its cedar siding along with its green roofs help it blend in to the surrounding enviornment.

The main cross axis visually pulls visitors thorough the garden into the auditorium and the field beyond. It leads to a meandering path through the garden for a immersive expereance and the interior circulation through the righth with the framed view through the garden to the site beyond.
